

## **Expectations for Remote Learning at TKA**

It is our desire that students use this remote learning time to continue to develop academically to the best of their ability. In order to be successful, there are some standards that each teacher will expect from each student.

- Attendance will be taken and tardies will be marked.
- Cameras must be turned on for the entire class time until instructed by the teacher to turn them off.
- Faces must be visible at all times in the camera.
- Proper lighting is necessary for faces to be visible.
- Students may not wear hood or face coverings while on camera.
- Other electronic devices need to be put away. Cell phones should not be easily accessible during class time.
- If dismissed from a class to work individually, students must return when requested.
- Students may not be in bed for class time.

### **Suggestions for Optimizing Learning**

- Designate a specific location for learning (desk, etc.)
- Have all your school essential items in the same location for each day. You should not have to run around to find all your learning materials.
- Establish some way to track and monitor homework in a way that works best for your learning style.
- Get up and get ready for the school day like you were going to school.
- During a break from classes, get up, walk around, take a breath from outside fresh air.
- At lunch, leave your school space if possible, make a complete lunch, and do something away from devices.
- Set limits for your free technology use after school time. You should not spend all afternoon and night on a device. Give your brain a break.
- Go to bed at a reasonable hour.
- When you go to bed, preferably put all devices outside your room.
