

Academic Protocol for Students with Concussions

It is our desire to ensure the overall wellbeing of the students of TKA. When a student undergoes a Traumatic Brain Injury, the student's medical wellbeing is the primary focus. Students can not perform at their academic capability if they are not medically ready. Rushing that process can create setbacks that hinder the medical wellbeing of the student.

The following steps are part of the Return to Academics:

- A student must be cleared to return to school by a medical professional.
- After being cleared, the student will attend partial days for 1-2 days to ensure that no medical symptoms resume.
- After the partial days are attended, the student will attend 1 full day.
- Classwork and Homework will be added after the full day of attendance. During this time, a plan to complete all missing assignments will be created and communicated to the teachers, family and student.

It is imperative that at any time a student has concussion symptoms, then the process should start again. Any new or returning symptoms should be reported to your student's physician.

As always, if you have any questions, please reach out to Mrs. Huber at stephanie.huber@tka.org.
